

"The life saving and life enhancing work of Motec is a good deed in an often nasty and dangerous world. Everyone involved deserves to be warmly thanked for their generosity in giving their skills, time and resources to this significant humanitarian endeavour.

"It's sometimes said that the man or woman who saves a single life saves the world. Motec puts that principle into practice and I hope its work continues to go from strength to strength.

"It's a great privilege for me to be associated with your wonderful work."

David Alton  
(Prof. Lord Alton of Liverpool).
