

Charity No 1118994

Sunday 4th August 2024, a charity fundraising event was held at Monks Spout Cottage, Glasshouse.

Barbeque – in Nigel’s expert hands, and garden games were the order of the day with the tea tent being set for an enjoyable afternoon.

It was a beautiful sunny day, and our guests arrived ready to enjoy the afternoon. We ate a wonderful lunch followed by a short talk on the work of MOTEC Life-UK – with specific emphasis on Nkawkaw and Child operations. A Powerpoint display showing photographs of Nkawkaw and work in Ghana continued throughout the afternoon.

Equipment requested by Nkawkaw included an ECG machine, Spirometer, Hand-held oximeter, Stethoscopes and Sphygmomanometers. Our objective was to fundraise as much as possible towards meeting the request. Many of our guests had first-hand experience on the use of ECG machines, oximeters and Spirometers, so personally knew the benefits.

One of our guest’s hand-made a quilt which was auctioned.

A raffle assisted our fundraising, and generous donations were made from local businesses – Leaf Creative donated a large Hosta plant, Glasshouse Inn donated and in addition two meal vouchers and a local beautician a voucher for a treatment.

On display to further interest in the event were WW2 reenactors Vicky and Philip Lambert, who dressed in Home Guard outfits displayed and spoke about their knowledge of UK guns and munitions through to 1940's, and American medical equipment – not so different from instruments used today!

After enjoying our luncheon, followed by tea we walked around the garden and played garden games. Then.....

Our guests put their hands deep into their pockets. We raised an amazing £942. By careful selection of equipment suitable for working in 50degrees heat, and re-conditioned Spirometer, this wonderful sum has enabled the request from Nkawkaw to be met in full.

Thank you to everyone who supported this fundraising event.

God Bless you and your families.

Jane Jackson
