

Motec Breast Team led by Mr Steve Goh have once again been stretched across rural Ghana this April. Team provided public, students and hospital staff education on breast in health and disease in lecture halls, churches in the Akosombo, Nkawkaw and Jirapa districts of Ghana. Breast screening was also the main part of the team programme coupled with surgical services with local surgeons at Nkawkaw and Akosombo.

Team included Dr Natasha Jiwa of London, Dr Sonal of Peterborough and Miss Patricia Dorsaa of the Military Hospital, Accra! Medical materials were donated to target hospitals by Motec and supporting British Breast Implant manufacturing Companies.

Dr Arhinful of Akosombo writes-

"Our profound appreciation for your unique sacrifices and work that you did when you visited us barely a week ago."

Well done everyone!
